

S-44 OBD Remote Cable

The Young Bowden cable control system enables accurate balancing dampers inaccessible above hard ceiling, through HEPA filters, behind grilles or in other difficult to reach locations. The 3-part system of damper, Bowden cable control kit and cable with wire are field attached and hand operated by a 12" .030 wrench.

Bowden Cable & Wire
270-275 Control Kit

Socket wrench to
engage cable.
