

## 250 HD Series – Heavy Duty Double Deflection Supply Grille

The 250 HD Series Heavy Duty Double Deflection Supply Grille provides effective directional control of the air stream. The hollow, air-foil grille front blades are set at a fixed at 0° or 45° on .5" centers. Back blades are spaced on .75" centers and each blade is individually adjusted for the desired air deflection without affecting the setting of any other blade. Available with horizontal face blades (250HD-H) or vertical face bars (250HD-V).

For supply registers, specify Series S-44 Opposed Blade Damper (OBD) attached to 250 HD Series. S-44 OBD assures even distribution of air across the grille face, as well as positive volume control.

### STANDARD FEATURES

- Type 304 stainless steel construction
- #4 satin polished finish
- Front air foil blades are fixed at 0° or 45° and back air foil blades are individually adjustable
