

250 LT Series – Long Throw Double Deflection Supply Grille

The 250 LT Series Long Throw Double Deflection Supply Grille provides effective directional control of large volumes of air flow. Each blade is pivoted which allows for custom air flow. The deflector blades are spaced on 1½" or 3" centers. Each blade is adjusted for the desired air deflection without affecting the setting of any other blade. Available with horizontal face blades (250H LT) or vertical face blades (250V LT).

Ideal for factories or plants where large volumes of air must be controlled.

STANDARD FEATURES

- Type 304 stainless steel construction
- #4 satin polished finish
- Deflector blades are individually adjustable
- Blade spacing options: 1.5" or 3"
- Countersunk mounting screw holes
- #10 x 1.5" stainless truss head sheet metal screws

OPTIONAL FEATURES

- Type 316 stainless steel construction
- Antimicrobial epoxy powder coat finish options
- S-44 opposed blade damper
- Custom blade spacing: 2", 2.5", 3.5" or 4" blade centers
