

## 550 LT Series – Long Throw Single Deflection Return Grille – 0° or 45°

The 550 LT Series Long Throw Return Air Grille is styled to match the 150 and 250 Supply Grilles. The face blades are non-adjustable and available in either a horizontal position (550H LT) or vertical position (550V LT), factory set at either 0° or 45° degrees, spaced on 1.5" or 3" centers, with custom configurations available at an additional cost. The same hollow air-foil blades used on the supply grilles are used on the return air grilles.

For return registers, specify Series S-44 Opposed Blade Damper (OBD) attached to 550 LT Series. S-44 OBD assures even distribution of air across the grille face, as well as positive volume control.
