

SSCB – Curved Blade Supply Grille

SSCB Curved Blade Supply Grille presents a clean, functional, strong appearance, along with high performance. It is designed for ceiling, high side wall, and low side wall installations. Excellent for variable air volume applications. It is available in 1, 2, 3, or 4-Way directional airflow configurations. SSCB louvers are spaced on 0.75" centers and individually adjustable from the face of the diffuser. Wide selection of duct sizes to choose from.

For supply registers, specify Series S-44 Opposed Blade Damper (OBD) attached to SSCB Supply Grille. S-44 OBD assures even distribution of air across the grille face, as well as positive volume control.
