

SSG – Louvered Return Grille

The SSG Series Louvered Return Grille is a non-adjustable return grille made with louvered blades for limited vision or exterior applications. The blades are reinforced from the rear on approximate 12" centers. The SSG Louvered Return Grille is a single side mounting frame for use when appearance only matters on one side. The auxiliary option provides a double-sided mounting frame (with no louvers on one side) to fit varying door thicknesses (minimum of 1.75"), where a finished look is required on both sides.

For return registers, specify Series S-44 Opposed Blade Damper (OBD) attached to SSG Series. S-44 OBD assures even distribution of air across the grille face, as well as positive volume control.

STANDARD FEATURES

- Type 304 stainless steel construction
- #4 satin polished finish
- Limited vision blades are non-adjustable
- 1" blade spacing
- Free area approximately 60%
- Countersunk mounting screw holes
- #6 x 1.25" stainless truss head sheet metal screws

OPTIONAL FEATURES

- Type 316 stainless steel construction
